### **Warning – U.S.A**

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

### **Notice - Canada**

This Apparatus complies with class "A" limits for radio interference as specified in the Canadian department of communications radio interference regulations.

### **WEEE Marking**

This marking shown on the product or its literature, indicates that it should not be disposed with other household waste at the end of its working life. To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate this from other types of wastes and recycle it responsibly to promote the sustainable reuse of material resources. Household users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take this item for environmentally safe recycling. Business users should contact their supplier and check the terms and conditions of the purchase contract. This product should not be mixed with other commercial wastes for disposal.

## **Declaration of Conformity**

**BIXOLON CO.,LTD**

**Thermal Printer**

**STP103**

**Reference Report No. : DR501203012AA**

The above product has successfully demonstrated that its product is in compliance with

**Electromagnetic Compatibility Directive 89/336/EEC**

EN55022 Class A : 1998+A 1 : 2000

EN55024 : 1998 :+A1:2001

(EN61000-4-2 : 1995+A1 :1998+A2:2001)

(EN61000-4-3 : 1996+A1 :1998+A2:2001)

(EN61000-4-4: 1995+A1 : 2001)

(EN61000-4-5 : 1995+A1 : 2001)

(EN61000-4-6 : 1996+A1 : 2001)

(EN61000-4-11 : 1994+A1 : 2001)

The above product's beginning Serial No.

Year of manufacture : 2004

We. The undersigned. Hereby declare that the equipment specified above conforms to the above Directive(s)

## **English**

### **Introduction**

The main features of the printer are as follows:

1. High speed printing
2. Low noise thermal printing
3. RS232 serial interface
4. Data buffer allowing the unit to receive print data even during printing.

Please be sure to read the instruction in this manual carefully before using your new STP-103.

### **NOTE**

The socket-outlet shall be near the equipment and it shall be easy accessible.

# Chapter 1. Unpacking

## 1-1. Checking the contents of the Printer

The items illustrated below are included with your printer.  
If any items are damaged or missing, please contact your dealer for assistance.

### Unpacking

## 1-2. Locating the Printer

Avoid direct sunlight or excessive heat.  
Avoid storing the printer in the places subject to excessive moisture.  
Avoid places subject to intense vibration or shock.  
Make sure that there is enough space around the printer so that it can be used easily.

### 1-3. Printer Part Names

- (1) Cover top
- (2) Case top
- (3) Case bottom
- (4) Control panel
- (5) Roller
- (6) Power switch
- (7) Interface connector (male)
- (8) DC Jack
- (9) Paper roll
- (10) Detector switch

#### Rear View

#### Control Panel

## English

### 1-4. Operating Control Panel

The control panel has two buttons and two lights.

#### Buttons

The control panel buttons allow paper feed and on line activation.

##### **ON LINE**

This button is not active in the custom firmware in this printer.

##### **FEED**

Press the FEED button once to advance paper one line. You may also press the FEED button continuously to feed paper continuously. The FEED button is always active.

#### Indicator Lights

The control panel lights provide information on printer conditions.

##### **POWER (green)**

The POWER light is on when printer power is on.

##### **ERROR (red)**

- 1) The error LED blinks quickly when paper is out.
- 2) The error LED blinks when the Near End Sensor (paper low) is triggered .

## Chapter 2. Connecting the Cable

### 2-1. Connecting the AC adapter to your printer

To power up the printer, only use the AC adapter, NH36-240150-11.

#### **WARNING**

Using an incorrect power supply may cause fire or electrocution and is at the customers' risk.

#### **CAUTION**

When connecting or disconnecting the power supply from the printer, make sure that the power supply is not plugged into an electrical outlet ; otherwise you may damage the power supply or the printer

1. Make sure that the printer's power switch is turned off, and that the power supply's power cord is unplugged from the electrical outlet.
2. Check the label on the power supply to make sure that the required voltage matches that of your electrical outlet.
3. Plug the power supply's DC cable connector into the printer's power connector as shown below.

4. Plug the AC adapter's power cord into an electrical outlet.

#### **NOTE**

To remove the DC cable connector grasp the connector at the inlet to the supply and pull it straight out. Make sure that the main unit's power cord is unplugged before you disconnect the DC cable connector.

## English

### 2-2. Tellermate Product – refer to your Tellermate Operation manual for details

You need an appropriate serial interface cable to connect your Tellermate to the printer's built-in interface.

1. Make sure that both the printer and TY are turned off :  
then plug the cable connector securely into the printer's interface connector.
2. Tighten the screws on **both** sides of the cable connector.

3. Plug the other end of the cable into the Tellermate equipment.

## Chapter 3. Installing Paper Rolls

Use a paper roll that matches the specifications – See Appendix C.

### NOTE

The printer must be turned off before installing the paper roll.

1. Open the printer cover and remove the used paper roll core if there is one.
2. Insert the paper roll as shown below.

3. Pull out the paper roll until the paper comes out from the top of the printer. Then close the printer cover using both hands, one on either side of the printer. Both sides of the printer lid must be pressed down so they click into place.
4. Turn the printer on.

## English

# Chapter 4. Setting the DIP Switches

### CAUTION

The DIP switch settings control the operation of the printer, changing the settings may mean that the printer will not communicate correctly to your Tellermate equipment. Only change these settings as directed by your Tellermate Customer Care Representative or Tellermate Authorised Distributor.

**Turn off the printer while setting the DIP switch** to prevent an electrical short, which may damage the printer.

1. Make sure the printer is turned off.
2. Remove the rubber bung covering the DIP switches.
3. There is a row of switches on the bottom of the printer. Notice that ON position is marked on each set of switches.

Use tweezers or some other narrow tool to move the switches.

4. Use the following table to set the DIP switches.
5. Replace the rubber bung.

**DIP Switch Functions**

No	Function	On	Off
1	* Serial Baudrate Setting		
2

# **Chapter 5. Running the Self-test**

## 1. Self-test printing

### 1) Starting the self test

To start printing the self-test on a paper roll, hold down the PAPER FEED button and turn on the printer with the cover closed. The self-test prints the current printer settings, which provide the following information :

- control software version
- dip switch state

### 2) Standby state

After printing the current printer status, the printer prints the message "Please press the FEED BUTTON.". The LED indicator blinks and the printer enter the test printing standby state.  
Press the FEED BUTTON to start test printing.

## 2. Ending the self-test

After a number of lines are printed, the printer indicates the end of the self-test by printing " \*\* TEST COMPLETED \*\* ".

If the self-test is not completed, then you must turn your printer OFF and ON.

## Appendix A. Connector

Serial Interface Connector

Tellermate part number: 805 064P

## Appendix B. Specification

Printing method	Thermal line printing	
Dot density	200 x 200 Dpi (8 dot/mm)	
Printing width	48mm	
Paper width	58mm	
Characters per line	42 (Font B) (9x24)	
Printing Speed	Approximately 1.97 inches / sec 50 mm/sec at 25°C/printing duty 12.5%	
Receive buffer size	15K bytes	
Supply voltage	DC	24V 1.5A
Environmental conditions	Temperature	0 ~ 40° (operating) -10 ~ 50° (storage)
	Humidity	30 ~ 80% RH (operating) 10 ~ 90% RH (storage)
MCBF	Mechanical	15,000,000 line
	Head	50 million pulse (about 50km)
Paper	Thickness	0.06 ~ 0.09mm
	Roll size	Ø60 ~ 57 (w)
	Roll spool diameter	Inside : Ø12mm (0.47") Outside : Ø18mm (0.71")

## **English**

### **Appendix C. Spares and Consumables**

Spares for the printer may be purchased from Tellermate or your Tellermate Distributor.

<b><u>Part Number</u></b>	<b><u>Description</u></b>
805 064P	STP-103 Serial Cable
904 155W	Power Adaptor NH36-240150-I1
621 533W	Printer Plastic Cover Top
805 151C	Mains Lead – GB
805 152P	Mains Lead – Europe
805 188E	Mains Lead – Japan
805 148A	Mains Lead – USA
805 189R	Mains Lead – Republic South Africa
805 190V	Mains Lead – Australia / New Zealand
904 801A	Printer user manual
650 062J	Dip Switch Rubber Bung
950 224R	Print head cleaning pen
904 149K	Approved paper rolls are supplied in boxes of 20 and may be purchased from Tellermate or your Tellermate Distributor.

See Appendix D for contact numbers
